Topic : dreamVision

Objective	Build a low-cost Smart Glass Prototype for Smart Factory
Deliverables	- Working Prototype capturing thermal Image - Connectivity Module with Defect Tracking and Traceability
Scope of Work	- Develop Circuitry - Software Development - Mobile App Development - Connectivity - Cloud Storage
Criteria	- Cost - Technology - Design - Reliability - Repeatability
Takeaways	- Skill Development - Immersive Learning - Interaction with Tech. Leaders - Industry Connect
Team Size	6 Minds Per team (5 teams?)
Duration	3 day

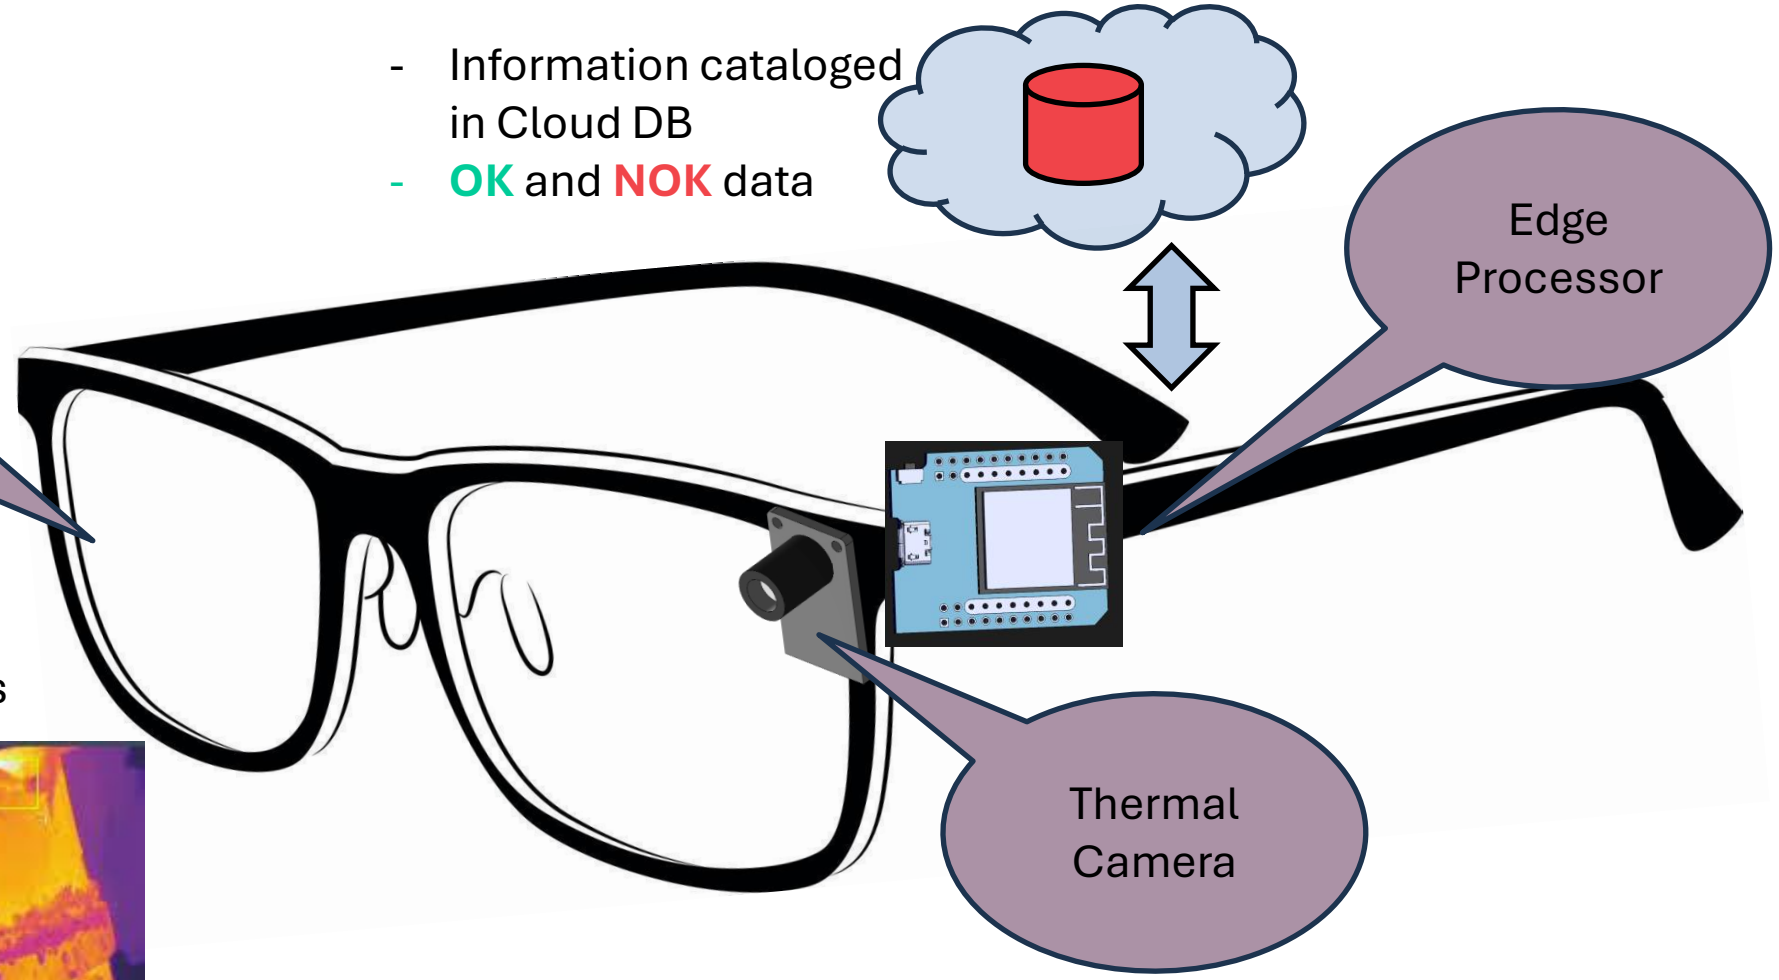
What ETL will Provide?

- Infrastructure
- Electronic Components
- Lab Access
- Technical Support
- Project Honing
- Problem Solving Toolkit
- Data Points

dreamVision

ENDURANCE
Complete Solutions

- Information cataloged in Cloud DB
- OK and NOK data



Live feed of defects
